PASSENGER AND CARGO TRANSPORTATION

CONTROL OF PUBLIC TRANSPORTATION- IMPLEMENTATION OF NEW CONTROL SYSTEM

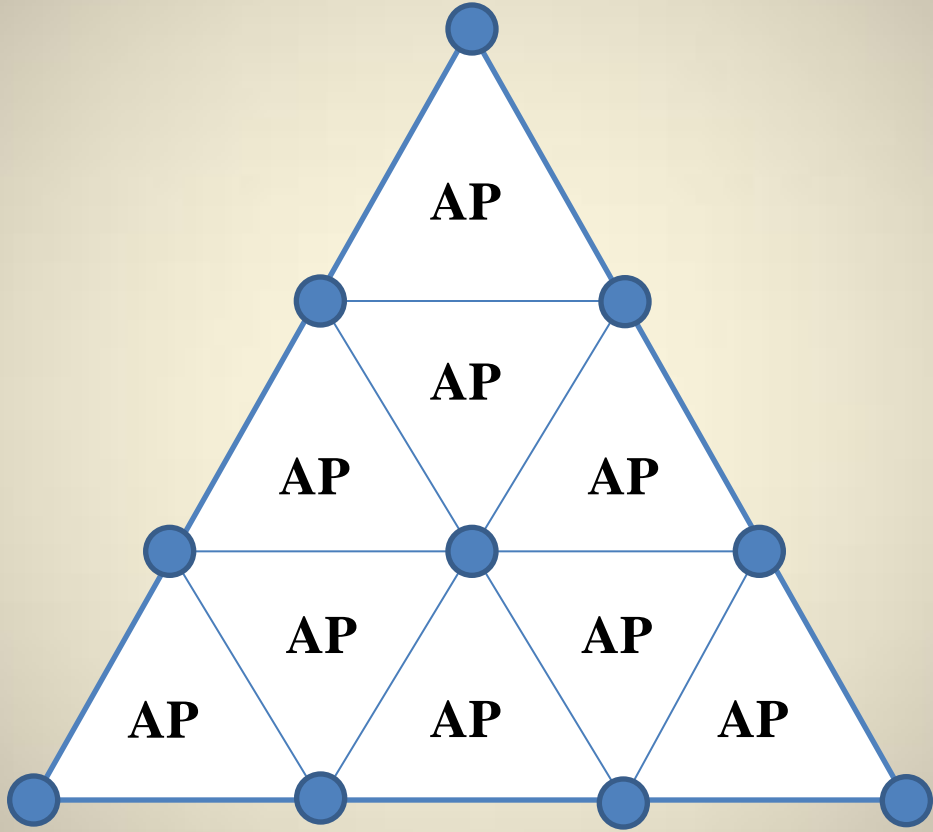

- 1) Income from selling tickets averagely increased by 18-20 %.
- 2) Control expenditures were averagely reduced by 10-15 %, and the control effectiveness increased up to 40-50%.
- 3) There were less violations in the public transport (from 50% to 70%)
- 4) The number of disturbances in the public transport became minimum.

2.CONTROL OF SUBURBAN AND INTERURBAN TRANSPORTATION

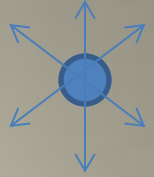

Principle of the pyramid

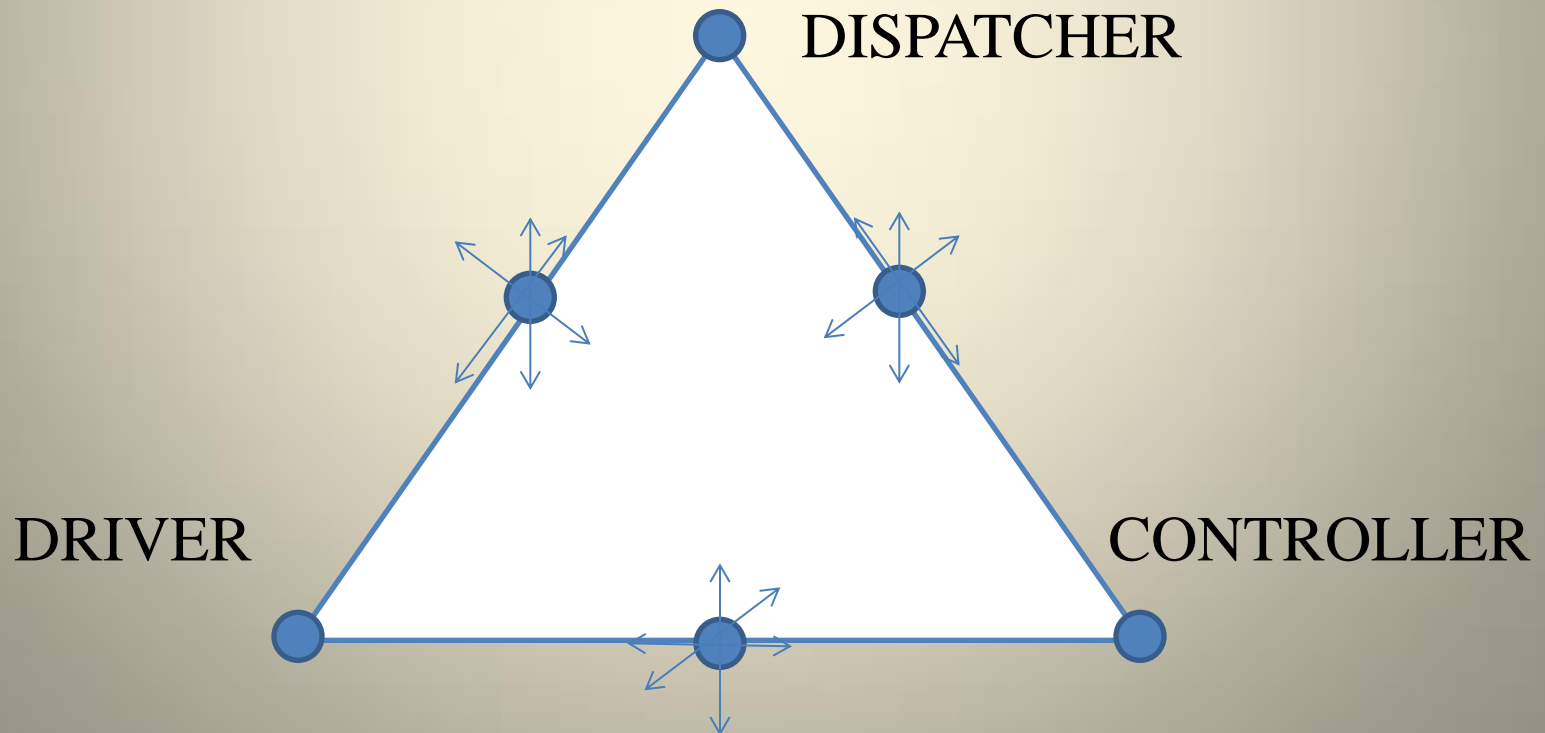

PASSENGERS IN THE PYRAMID'S TRAP

PRINCIPLES OF NEW CONTROL

- 1) Mobility
- 2) Confidentiality
- 3) Qualification
- 4) Operative problem solving

DORSIMUS CONTROL

The principles of new control shatter the pyramid and prevent from forming again, because there are no conditions to exist.

Statistically, within 12 months of new control system, there were only 1-3% of violations in suburban and intermural transportation, and income from transporting passengers increased up to 50%.
