

## CONTENTS

Technique of Substantiation of a Planning Decision at Modernization of Circular Crossings on the Basis of Forecasting Losses in Traffic <i>Kapsky Denis, Kuzmenko Vasiliy, Kustenko Tatyana</i> .....	4
Scheduling Chain Models with Operations of Random Durations in Transportation Systems <i>Zohar Laslo, Dimitri Golenko-Ginzburg</i> .....	12
Optimum Algorithm of Semi-Analytical Inertial System in Geographical Coordinate System <i>Tatyana Trifonova-Bogdanova, Oleg Zarianski, Peter Trifonov-Bogdanov</i> .....	20
Approach for Use of Intelligent Transport Systems for Urban Trip Choice <i>Alexander Berezhnoy, Konstantin Chudinov</i> .....	24
Globalisation and Engineering Education: Preparing Students for Professions of the 21 <sup>st</sup> Century in Science and Technology <i>Yulia Stukalina</i> .....	30
The Comparative Analysis of the Decision of Optimisation Problems by Genetic and Gradient Methods (In Russian) <i>Oleg Chernishev, Arkady Borisov</i> .....	40
Statistical Modelling of Trucks' Work on the International Routes at Various Strategies of the Return Loading (In Russian) <i>Sergey Azemsha</i> .....	53
Cumulative Index .....	62
